FCC

Re: Proceeding 04-233

Comments:

Please accept these brief comments as confirmation of my support for maintaining the current priority of existing FM translator services in lieu of Low Power FM (LPFM).

I am a listener of Air One broadcast radio which is transmitted on local and regional translator services. Air One provides strong family oriented programming to our local community which is enjoyed by many.

I am concerned about what type of programming would replace Air One should LPFM programming be given priority over existing FM translator services.

Clearly, in our community, Air One programming and its family oriented content is highly valued and remains in the public interest.

Thank you for your consideration of my comments!

Best regards,

Kerry Billings
